DOMINION BUREAU OF STATISTICS

EDUCATION STATISTICS BRANCH

PRELIMINARY REPORT

of the

UNIVERSITIES OF CANADA

for the

ACADEMIC YEAR

ended

JUNE 1924

Survey of higher education

+++

Published by Authority of the Hon. Thos. A. Low, M. P.,
Minister of Trade and Commerce.

+++

OTTAWA

1925

Agricultural Courses	697
Nurses' (Dietetics, etc.)	233
Journalism	460
Civics	155
Prospectors'	46
Business (Merchants', export Trade, etc.)....	275
Medical	45
Botany	85
Dramatic Art	24
Workers' Educational Association	988
Tutorial Classes	333
Summer Schools (Various Courses).....	594
Preparatory " "	37
T o t a l	3,972

The corresponding number in these short courses in 1923 was 2,074 and while a part of the increase in 1924 may be due to more complete reports, it is certain that this part is not large.

Table 3 shows the number of degrees granted by universities in 1924 as 3,683 first, and 1,448 graduate degrees. The combined number of first and graduate degrees probably gives a better idea of the situation, since some misunderstanding may have arisen as to what constitutes a graduate degree --- for example, certain institutions may regard a professional degree as a graduate degree by virtue of the fact that the recipient has already been granted a degree in Arts or Science. The total number of degrees conferred, therefore, was 5,131 of which 2,177 were in Arts, pure Science, Letters and Philosophy; 756 in Medicine; 483 in Engineering and Applied Science; 376 in Music and 219 in Law. This gives a total of 4,011 in five faculties, while the remaining 1,120 degrees were divided among eleven faculties. The number of degrees in these five faculties in 1923 was 3,810, each of the five faculties showing increases in 1924 except engineering, which showed a decrease of 184. Medicine showed an increase of 196 or about 34 percent, while Arts remain practically stationary.

Table 5 shows the migration of students from one province to universities in other provinces, also the attraction to Canadian universities of students from places outside of Canada. Students from other countries, among which were mentioned United States, Newfoundland, West Indies and the British Isles, attended Canadian universities to the number of 1,090, while 3,085 residents of Canada attended universities in other provinces than their own. This table, (which gives only the students in regular courses) and table 1 show that of the 24,352 students in regular courses 23,260 were Canadians. These do not take into account a large number of students in regular university courses in colleges.

Table 6 shows that in 1924 the assets of universities amounted to \$80,864,627, the income to \$10,541,874 and the expenditure to \$11,716,921. The excess of the expenditure over the income should not be misunderstood. In state-controlled universities it may happen that the Government grants to cover the expenditure of one year is counted in the income of the following year, instead of the year in which the expenditure was incurred. There is, therefore, little or no significance in the fact that the expenditure exceeds the income of that year. Of the total income rather less than one-fifth was in the form of fees, nearly one-sixth was in the form of investments, and about the same proportion was from other sources than government grants. About one-half was in the form of government grants.

^x Excluding 665 duplicate registrations (318 males and 347 females) at Toronto, Victoria and Trinity. Notice also that the grand total differs from the totals by sex to the amount of 1,752, owing to 444 unspecified by sex in short courses at the University of B.C. However, the students are all specified by sex in the totals of Preparatory and Regular Courses.

(See Notes on attached sheet)

Notes to Universities: Number of Students in the Various Faculties, 1923-1924.

1/ Agriculture 260 males; French Summer School 27 and 120. 2/ A number of extension courses. 3/ Diplomas awarded for these courses are recognized by the Prov. Government as qualifying for principalships of High Schools in the Province of Quebec. 4/ The totals in regular courses (3,405 and 1,448) do not include the Preparatory students 2,479 and 900 because "Regular Courses" in this table means what is ordinarily understood as "Regular University work", that is, they do not include High School courses. In the Classical Colleges and other Secondary Institutions affiliated or annexed to Montreal, where the above students in Preparatory and Undergraduate Courses in Arts are also registered, these Preparatory Courses really form part of the regular eight year course in Arts, so that so far as this University is concerned the true registration in regular courses is 5,884 males and 2,348 females. 5/ Nursing, 27, Civics 155. 6/ Of these 3,629 and 938 were in affiliated colleges, 51 and 782 in annexed schools and 622 and 9 in associated schools. 7/ Of these 141 and 77 were in Arts, 6 and 1 in Medicine, 16 males in Applied Science and Eng., 80 and 6 in Education and 19 and 21 in Miscellaneous graduate courses. 8/ All work taken at the Ontario Agricultural College. 9/ Included with Engineering. 10/ Included in Faculty of Arts. 11/ All work taken at the Royal College of Dental Surgeons. 12/ See note 9. 13/ All work taken at the Ontario College of Pharmacy. 14/ All work taken at the Ontario Veterinary College. 15/ 46 male Prospectors, 87 Females in Dietotics for Nurses, 47 Males and 413 Females in Journalism and Nurses, 54 males and 2 females in Export Trade, 4 males and 20 females in Dramatic Art, 442 males and 546 females in Workers Educational Association, 73 males and 260 females in Tutorial Classes. 16/ Teachers' classes October to March, 98 and 123; Summer Session (5½ weeks) 69 and 50; Correspondence Courses preparatory to Summer Session Arts, etc. 119 and 160. 17/ Of these 256 and 283 were at Victoria College, 62 and 64 at Trinity, and 95 and 98 at St. Michaels' College. 18/ In Theology. 19/ Special students 55 and 35, Public Health 1 and 8. 20/ Accounting 246, Banking 241. 21/ School of Pedagogy. 22/ 3 males of these were in Theology, 32 males and 2 females in Art. 23/ Including 41 and 4 in Medicine, 184 and 35 in Merchants' Course, 113 females in Public Health Nurses Courses, and 98 and 57 in Summer School. 24/ Evening Courses in Accountancy. 25/ Accountancy. 26/ Summer School. 27/ Agricultural Courses: Gas Tractor Jan. 70, Feb. 61, Threshing Machine 57, Blacksmithing 10, Poultry 7, Night Classes 31 and 87. 28/ Arts 50 and 30, Agriculture 6 and 3, Pure Science 8, Applied Science 8 males. 29/ Included under Engineering. 30/ Includes 16 Instructors doing part-time work. 31/ Short course in Dairying. 32/ Including courses leading to degrees in Arts, Pure Science 35 and 59, graduates doing work extra-murally, 34 and 11 (These are also included under Graduate Courses.) 33/ Arts and Science 28 and 12, Applied Science 7 males, Agriculture 7 males, Teacher-training 20 and 35. 34/ Summer Session 292, Agriculture 61, Public Health Nurse 6, Botany 85.

Notes to Universities of Canada: Degrees Conferred, by Institution and Faculty, 1923-24.

- 1/ Diplomas.
- 2/ In addition to these there were 197 degrees or diplomas granted to students in Preparatory Courses other than courses leading to Junior Matriculation bringing the total number of first degrees up to 423.
- 3/ Including 4 Honorary.
- 4/ Including 1 Honorary
- 5/ In teacher's classes.
- 6/ Public Health.
- 7/ Including 16 B.S.A. and 9 Associate Certificates.
- 8/ Accounting.
- 9/ Including 1 B.S.P. and 35 Certificates.
- 10/ Including 16 Pharmacia licenses and 3 degrees.
- 11/ These figures in previous reports were designated as "Others."

Preliminary Report of the Universities of Canada for the Academic Year
ended June 30, 1925.

The twenty-three universities of Canada include six state controlled (New Brunswick, Toronto, Manitoba, Saskatchewan, Alberta and British Columbia); four undenominational (Dalhousie, McGill, Queen's and Western) and thirteen denominational. Of the last mentioned, St. Dunstan's, St. Francis Xavier, St. Joseph's, Laval, Montreal and Ottawa represent the Roman Catholic Church; King's, Bishop's and Trinity the Church of England, Acadia and McMaster the Baptist Church, King's and Victoria formerly represented the Methodist church. King's is in federation with Dalhousie while Victoria and Trinity are in federation with Toronto.

Table 1 of this report shows that the total staff of universities in 1924 consisted of 3,864 professors and instructors of whom 884 were in preparatory courses. The staff credited to other than preparatory courses consisted roughly of 2,992 of whom 12 must have also taught preparatory courses. Approximately 2,380 of the total staff on regular and short courses were full time and 600 part time. The information about the staff in the various faculties is only of limited value since members of the staff of one faculty, may also teach in another faculty. Thus a professor in Mathematics or Physics may teach students in Arts, Pure Science, Engineering, Medicine, etc. By one university he may be reported under Arts only; by another university he may be reported under other faculties as well. It will be noticed that only rarely the total excluding duplicates is the sum of the different faculties, the reason being that the same personnel are entered under more than one faculty.

Table 2 shows that the total registration of students was 49,843. Of these 30,302 were males and 19,541 females; 15,669 were in preparatory courses, 25,692 were in regular courses; 4,008 in short courses, 2,378 in correspondence courses and 2,531 in other courses including various extension courses. In four universities the students in short courses were also students in regular courses which explains a duplication of 535 in these figures. Of the correspondence students a large number were taking regular courses leading to degrees in Arts, etc., so that in a sense the students in regular and correspondence courses might be added giving a total of 28,070. A list of the short and extension courses with the number of students in each may be given as follows:-

For teachers	1,057
Preparatory	41
Agriculture	371
French Summer School	160
Household Science	34
Civics	148
Dramatic Art	44
Public Health and Nurses	476
Business	177
Insurance	187
B.A. for Teachers	203
Tutorial	321
Workers' Educational Assn.	892
Navigation	24
Dairying	79
Botany	57
Miscellaneous Night and Unspecified Courses	2,268

Grand Total 5,482 (See sum of
short and other
courses Table 2).

Table 5 shows the number of degrees by faculties, the first and graduate degrees being combined in all cases except Arts and Pure Science, Letters and Philosophy. The number of degrees should usually be considered by individual institutions rather than by totals. However table 3 shows that the number of first degrees in Arts etc., corresponds closely with the number of 4th year students in fourteen universities which report the number of students by years. "First degrees" should include all classes of Bachelors' degrees, while graduate degrees refer to Masters' and Doctors'. However, there is a practice in some universities of giving different

grades of Bachelors' degrees, so that the higher grade is given to holders of the lower grades. The holder of the lower grade would be considered a graduate, so that there is danger that the higher grade is occasionally reported as a graduate degree. Again the faculty of Philosophy is in some universities an ecclesiastical faculty and its degrees are granted by the church not by the state. Those receiving a first degree in Philosophy might already hold a degree in Arts, Science or Letters, so that they would be considered graduates. Similarly a degree of B.Sc. to one already holding a B.A. or vice versa might sometimes be reported as a graduate degree. The similarity between the numbers granted first degrees with the numbers in the fourth year in Arts etc., shows that very few of these "Graduate" degrees can have been included in the returns of fourteen of the universities, while the foot notes in many cases show the degrees in detail. The practice of giving first degrees of different grades prevails only in few universities and these are not included with the fourteen with whose fourth year the number of first degrees is compared in Table 3. This table also shows the elimination between the first year and the fourth in Arts, pure Science, etc. Part of this elimination is due to the fact that many students are reported in the first two years in Arts etc; part is due to the fact that some students in Engineering etc. have the same academic courses in the first two years as the students in pure Science. Where possible the students registered in Engineering were separated from the other Science students. The number of students by Academic years must, therefore, be studied subject to the caution that the elimination shown does not indicate the full dropping out of university work after two years. The difference between the total of the first four years and the total number of undergraduates is explained by partial or occasional students who register in Arts etc. for some courses or for a short time.

Table 4 shows the number of students from places outside of the province in which the university is situated (4,097). It also shows the number of non-Canadian students included in the total registration in regular courses in Canadian universities (1,118). It is probable that the number of Canadian students in universities outside Canada at least equals the number of non-Canadians registered in Canadian universities.

Table 6 shows that the assets of Canadian universities amounted to \$79,895,986; and the expenditure to \$10,726,541. The difference between the income and expenditure is largely explained by the non-inclusion of government aid over and above regular grants in the case of state controlled universities. It does not mean that the universities are so much in debt. An attempt was made to separate fees received for tuition, laboratory, etc. from receipts for board and lodging, mainly for the purpose of removing false impressions about the higher fees in the case of residential than in that of non-residential universities. It is clear that the larger "fees" received by residential institutions do not mean that the gross cost of attendance is greater.

Analysis of the number of students by faculties will be made in the combined report of universities and colleges in as much as certain faculties like Law, Theology, etc. are not fully represented by statistics of universities alone. The same may be said of Arts. It should always be remembered that Grade XII in the high schools is often considered as equivalent to the first year in Arts, also that several colleges give a full course in Arts. To the number of students thus represented should be added the Arts students of Junior colleges which are now rising in Canada and which are understood to offer two years in regular Arts work (i.e. above matriculation). These colleges will be mentioned more fully in the report on Professional, Technical and Affiliated Colleges.

The figures for "All Others" are omitted, where more than one course is represented, owing to uncertainty as to the number of duplicates; they are given in detail in the foot notes.

1/ Kings and Dalhousie are associated Universities situated in the same city, Halifax; consequently the staffs of the two are to be considered conjointly. 2/ Also included under Arts and Science. 3/ Including 16 males in Commerce and 1 male in music. The 16 are also included under Arts 4/ Forestry. 5/ Including 6 instructors. 6/ Under graduate preparatory studies. 7/ This includes 14 professors (male) and 8 m. and 1 f. instructors in the regular courses; 4 m. and 1 f. in addition in under graduate preparatory studies in short courses. 8/ Including 4 part-time. 9/ Including 11 m. in Commerce; 8 f. in Household Science; 18 m. and 7 f. in Music; 22 m. and 6 f. in Nursing; 15 m. and 2 f. in Social Service; 10 m. in Short Courses in Agriculture; 8 f. in Short Courses in Household Science; 7 m. and 15 f. in French Summer School; 30 m. and 3 f. in Extension Courses. 10/ Education. 11/ Agriculture 17; Commerce 7; Education 1; Forestry 13; Household Science 12f; Music 11 m. and 30 f. 12/ Including 11 m. in affiliated Colleges. 13/ Agriculture 17; Commerce 7; Education 1; Forestry 13; Household Science 12f; Music 11 m. and 30 f. Nursing 4 m.; Social Service 12 m; Veterinary Science 9 m; Civics Short Course, 4 m. and 1 f.; **Civics** in Correspondence 4 m. and 1 f. 14/ Of these 374 m. and 157 f. were in affiliated Colleges and 56 m. in Associated Schools. 15/ Education 27 m. and 2 f.; Forestry, 5 m.; Household Science 10 f; Music 4 m; Public Health and Nursing 14 m. and 1 f. Social Service, 8 m. and 4f; P.A. Course, Summer Session, 12 m; B.A. Course Teachers' Class (Oct.-May), 18 m; Tutorial Classes 8 m; Workers' Educational Assn. 29 m. and 3 f; Correspondence Course, 28 m. and 1 f.; Short Courses in Dramatic Art, 5 m. and 1 f.; Nurses' Summer Course, 10 m; Business Cycle, 17 m; Public Health Nursing, 9m. and 5 f; Insurance, 19 m; Nurses-in-training, 2 f. 16/ Not including staffs of Federated Universities and Colleges. 17/ Those are in the Under-graduate Courses. There were 9 m. in Grad. Courses in Arts; presumably these are included with the 17. 18/ Including 2 part-time. 19/ Short Courses for Teachers 11 m; Public Health, 6 m. and 2 f. 20/ Including 22 m. and 4 f. in Affiliated Colleges, also including 139 m. and 24 f. in Regular Courses, and 11 m. in Short Courses for Teachers. 21/ Commerce 9 m; Summer School for Teachers 19 m. and 1 f; School of Navigation (Dec.-Mar.) 3 m.; Corres. Courses Arts instruction about 60 m. 22/ The staff, excluding tutors, was 79 m. and 7 f. The total of 117 was not given by sex. 23/ School of Pedagogy. 24/ Including 13 full-time and 61 part-time. 25/ Agriculture. 26/ Agriculture 17 full time and 2 part-time; accounting 2 m; Household Science 2 f; Summer school 2 m. and 1 f. 27/ 23 m. in Agriculture. 28/ The Grand total 3,864 exceeds the sum of the preparatory courses, the full-time and part-time staffs by 131, owing to 113 unclassified by B.C. and 28 by Mt. Allison, and to 4 appearing twice in St. Dunstan's and 8 appearing twice in St. Francis-Xavier.

Total of 14 universities		2,769	1,921	1,455	1,237	518	7,900	8,314	1,250	23,397
Per 1000 stu- dents by year		351	243	184	157	65	1,000			

1a/ The number given as Preparatory includes 30 in the first year and 20 in the second year of the course at this University, the third year being taken as equivalent to the first year in Arts. The total includes 22 Commercial students who are not given by years. Presumably the 48 in the fifth and sixth years are following the Philosophy course, which in this University is considered Graduate work.

1/ Including 158 in the Regular Degree Courses in Arts and Pure Science as given by years alone and 59 special students; the remaining 16 being students in Household Science, Music, Finance and Commerce and Theology, whose Academic subjects would be taken with the students in Arts and Pure Science. Including the first two years of Engineering, the Academic subjects of which would come under pure science, the total number of students taking Arts and Science subjects by years was: 1st year, 78; 2nd year, 63; 3rd year, 39; 4th year, 34; graduates 5; special, 59.

2/ Of whom 107 are partial students.

3/ It will be noticed that there are only 3 academic years mentioned for Bishop's College, the 3rd year being the graduating year in Arts.

4/ Of whom 9,816 were in affiliated institutions. See table 2.

5/ Including 120 occasionals and 281 in Teachers' Course and excluding 30 duplicates.

6/ Conferred by the University of Toronto.

7/ Including 6 occasional students.

8/ Including 55 partial students and 2 candidates for examinations only.

9/ Including 239 Special Students and those having a limited program, that is, less than a year's work.

10/ Presumably 67 of these were special or occasional students not given by years.

4. UNIVERSITIES IN CANADA: NUMBER OF STUDENTS ATTENDING UNIVERSITIES OUTSIDE THEIR PROVINCE OF RESIDENCE.

1a/ "First Degree" in Arts means Bachelor's Degree. "Graduate Degree" means Masters and Doctors.

1/ See Note 1a/ to table on Students by Academic Years.

2/ Including 29 A. B.; and 4 B. Sc.

3/ Including 4 M.A.; 1 M.A. Hon and 1 LL.D. Hon.

4/ Certificates in Engineering; 6 certificates in Theology.

6/ Including certificates.

10/ Including 15 First Degrees granted in B.A. Summer Session, and Teachers' Classes Oct.-May.

11/ Including 1 Honorary.

12/ Including 22 Graduate degrees in Engineering and Applied Science of which 9 were Hon.; 8 First and 2 Graduate degrees in Architecture and 123 First Degrees in Engineer. and App. Science.

13/ Including 10 First and 1 Graduate.

14/ Including 4 First degrees and 5 Graduate.

16/ Conferred by Toronto and included with the Degrees of Toronto. Not included twice in the total.

19/ Including 40 First and 2 Graduate.

21/ The 48 Graduate Degrees included 45 in Philosophy

23/ Including 1 in Architecture; 6 in Engineering and 14 in Electrical Engineering.

25/ Including 70 B.A. and 14 B.Sc.

26/ Including 5 M.A. and 4 M.Sc.

27/ Including 13 B.S.A. and 9 certificates.

28/ B. Acc.

29/ Including 1 Graduate

32/ Including 19 First Degrees and 4 Graduate.

33/ 10 First Degrees and 2 Graduate.

34/ Including 17 First and 1 Graduate.

35/ Including 27 First and 7 Graduate.

PRELIMINARY REPORT OF THE UNIVERSITIES OF CANADA FOR THE
ACADEMIC YEAR ENDED June 30th, 1926.

The twenty-three universities of Canada include six state controlled (New Brunswick, Toronto, Manitoba, Saskatchewan, Alberta and British Columbia); four undenominational (Dalhousie, McGill, Queen's and Western) and thirteen denominational. Of the last mentioned, St. Dunstan's, St. Francis Xavier, St. Joseph's, Laval, Montreal and Ottawa represent the Roman Catholic Church; King's, Bishop's and Trinity the church of England. Acadia and McMaster the Baptist Church. Mount Allison and Victoria formerly represented the Methodist church. King's is in federation with Dalhousie while Victoria and Trinity are in federation with Toronto.

The total teaching staff of the universities in 1926 consisted of 4,126 of whom about 500 were women. Over 2,600 of the total staff were full-time teachers. Exclusive of Queen's and Ottawa which gave only the total staff (292) the number of full, associate and assistant professors was 1,901 besides 63 deans and 22 teaching principals. As might be expected the great majority of the part-time staff were lecturers, instructors, tutors, etc. while about 80 p.c. of them were in four universities. (See Table 1)

The total student registration exclusive of duplicates between federated universities was 44,483. In addition to these were over 15,000 in various extension courses in the University of Saskatchewan, and probably the majority of 1,500 extension students in the University of Manitoba who were excluded from the total, the reason in the case of the latter being that it was impossible to ascertain how many of them were also included in the registration in other courses. Thus at least 60,000 persons in Canada came within the sphere of university teaching in addition to those registered in affiliated and professional colleges. This figure should not be quoted as the number of university students. Table 2 and the following tables show that besides regular students of university grade it represents pre-matriculation and vacation students, the courses taken by the last mentioned being of many grades including degree course taken by over 3,000 students. Notwithstanding this the grand total of 60,000 is an important figure. In the first place it represents, as just mentioned, persons coming directly under the influence of university teaching; secondly it represents (with the exception of some 5,000) either adults or persons who are of an age to discontinue ordinary school work; thirdly it may be said that even the total number would by earlier universities be considered a genuine university population; i.e. these universities would consider not only the regular degree students but also those now called preparatory students as a part of their system. Practice varies even to-day in this respect. In some places, including a part of Canada, the term Superior Education is confined to graduate and professional work, the term "Secondary" being applied to preparatory and undergraduate work in arts. It should also be mentioned that the total university registration in other countries includes students doing work under university standard. Thus in the report of the universities of the British Isles for 1925-26 the total registration of 90,509 consists of 41,606 full-time and 14,690 part-time students in courses of university standard, 16,276 not of university standard and 17,937 in extra-mural courses.

The registration in Canadian universities of students doing work of university standard was 28,183 including 19,870 men and 8,313 women. By "university standard" is meant that before entering upon this work the student has "matriculated". This term has a uniform meaning throughout Canada except in the case of matriculation to "Honour Courses" and certain other course in some universities. Matriculation to a four year "pass" course in arts in practically all Canadian Universities is equivalent to the completion of Grade XI of the high school course including the ancient or modern languages required by each university. By one or two universities this "Honour Matriculation" or the equivalent of Grade XII admits the student only to the first year of a "Honour" Course but this merely means that the "Honour" course takes one year longer than a "Pass" course.

Of the 28,183 students doing work of university standard 21,302 were full-time and 1,288 were part-time students preparing for first degrees 665 were full-time and 244 were part-time students preparing for graduate degrees, while 3,445 were vacation including correspondence or extra-mural students preparing for degrees.

This leaves some 1,200 students who were doing work of university standard but not preparing for degrees. These would include occasional students, students taking only a few subjects, etc.

Taking the students by faculties we find 12,724 full-time and 1,083 part-time students in Arts, Pure Science and Letters of whom 12,326 full-time and 472 part-time students were preparing for first degrees and 321 full-time and 156 part-time were preparing for graduate degrees. If we add to these the vacation course degree students it will be noticed that Arts, etc. or what might be termed the purely academic, as contrasted with the vocational faculties, absorbed more than half the students of university grade. Grouping the remaining students according to the general nature of their courses we have the following figures:

	<u>Full-Time</u>	<u>Part-Time</u>	<u>Total</u>
Medicine, Dentistry, Veterinary Science, Public Health and Nursing and Pharmacy...	3,842	242	4,084
Engineering and Applied Science (including Architecture).....	1,909	6	1,915
Music.....	487	1,204	1,691
Theology and Philosophy.....	1,084	311	1,394
Household Science.....	652	532	1,184
Commerce (including Accounting).....	661	215	876
Education.....	344	480	824
Agriculture and Forestry.....	633	78	711
Law.....	508	1	509

Theology is not fully represented since it is taken largely in colleges. Agriculture does not include the students of Nova Scotia and Ontario Agricultural Colleges, so that it also is not fully represented, while Law does not include the students of Osgoode Hall. These figures will be given in a later report on the combined statistics of universities and colleges.

Perhaps one of the most interesting facts in these statistics is that 3,445, or nearly a seventh of the degree students are in vacation and correspondence courses. This would seem to indicate that there is a very marked excess in the demand for higher education over the means to attend institutions of persons qualified for it. "Means", of course includes not only financial means but also time and other opportunities. This is further indicated by the fact that 1,532 of the remaining degree students are part-time students. Thus about 5,000, or a fifth, of the degree students are either part-time, short or vacation course students. These figures, it must be remembered, do not include the statistics of Frontier College which has a considerable number of degree students who otherwise would not be able to take work leading to degrees. Canada has 23 universities averaging 1,000 resident degree students each. It would require about five universities of this average size to accommodate the students who are taking degrees by means of part-time, correspondence, vacation, and other short courses.

Table 7 gives in full the number of degrees, licenses, diplomas and certificates conferred by Canadian Universities in 1926. It was not possible to group the licenses, diplomas and certificates strictly according to the scholarship required to obtain them, and the grouping given must not be understood to indicate this scholarship. The requirements for a "license" may be higher than those for a "Graduate" degree. Since these requirements vary with universities it would not be possible to standardize them in statistics. Since they are given by name there should be no misleading features in this table.

Of the 4,829 degrees etc. conferred, 3,432 were conferred on men and 1,397 on women. Bachelor degrees were conferred upon 2,343 men and 895 women; Master degrees on 209 men and 61 women; Doctor degrees on 531 men and 18 women. The licentiates, diplomas and certificates for reasons given should not be added. By far the largest number of Bachelor degrees was in the Faculty of Arts, while a comparatively small number was in the Faculty of Pure Science. This may not be significant since there is not always a clearly defined distinction between Arts and Pure Science. What distinction there is usually consists of a concentration on the part of Science students upon the Natural Sciences and modern languages and on the part of Arts students upon the Ancient languages and Social Sciences such as history, economics, psychology, etc.

The number of full-time students in Arts, Pure Science and Letters are given by Academic Years for 16 universities in Table 9. The classification in the remaining universities being somewhat different from this they are not included. In this table the number of first degrees in Arts, etc. is also given for these sixteen universities and can be compared with the number in the fourth year. The reasons for certain difference are obvious. Where the number of degrees exceeds that of the fourth year it is probably due to deferred etc. degrees. The purpose of the table was to link the academic work of the Universities with the continuation work of the ordinary schools. The sixteen universities given should be a good sample of the proportions between the various years. These proportions together with the proportions in the four years of our high school systems are as follows:-

	<u>Universities</u>	<u>High Schools</u>
First Year.....	34.9	42.8
Second Year.....	27.4	28.8
Third Year.....	19.8	23.4
Fourth Year.....	17.9	5.0
Total.....	100.0	100.0

Table 8 shows the number of students by place of residence. It is noticeable that 916 of the students in our Canadian Universities are from the United States, i.e. including universities and colleges about 1,000 are from the United States. Answers to a questionnaire sent to universities and colleges of the United States show that about 1,200 Canadian students are in United States higher institutions. This information will be given in greater detail in another letter, but as it is a new and rather important field of inquiry it would seem to require more than passing mention here. The fact that the numbers are so nearly equal appears surprising at first sight. No doubt there are many contributory causes. While the United States have a larger number of institutions to accommodate students than Canada they have also a larger number of students with their different reasons for selecting institutions of learning. Probably a large factor influencing the selection is filial or national attachment, e.g. a considerable portion of the U.S. students in Canadian institutions may be ex-Canadians or ex-British or some of their relatives may be graduates of these institutions. Again the Canadian institutions drawing the largest number of U.S. students are near the border. The emphasis on a particular subject in one university may be another reason. The migration^o of students between the provinces of Canada as shown in Table 8 throws a certain amount of light on the matter, but after exhausting ordinary explanations it is clear that a good deal is left to explain. Explanations, however, render none the less important the fact that the number of Canadians in U.S. institutions and of United States students in Canadian Institutions are nearly equal.

Table 10 shows that the total expenditure of universities in 1926 (excluding Laval) was \$10,435,055. Of the income almost exactly the same amounts were received from investments and tuition fees. Almost half of the total income was contributed by governments and municipalities. The items which can be compared with former years show an increase of about eight millions in total assets, some increase in total income and a decrease in total expenditure over 1925. The decrease in expenditure was particularly noticeable in capital expenditure

Notes: - A few points of difference between the number of matriculation students in this table and in Table 3 are due to difficulty in assigning certain students by St. Dunstan's, St. Fr. Xavier, Acadia and McMaster. These students evidently did work both of matriculation and University Standard.

Notes to Table 2

1/ Taking preparatory classes in Latin and French only. 2/ However, Agric., Phar., Theol. and Vet. Science might be added to the above, but respectively Ont. Agric. College, Ont. College of Phar., Victoria, Trinity and St. Michael's; and Ont. Vet. College. 3/ 79 men and all the women are also included under Toronto, but are not added twice in the Grand Total below. 4/ 5 students in Theol. College not included in these numbers. 5/ Brandon College. 6/ Evidently students taking a preparatory class or two besides their ordinary work. 7/ There were in addition 1,511 of both sexes in Summer Schools etc. Some of these were in the 2,428 but not all. The amount of duplication is not known. 8/ 521 of both sexes were in Short Courses. It is not known how many of these are in addition to the 1,463. 9/ There were in addition 14,359 of both sexes in short and extension courses who are not included in the total of 2,134. 10/ There were over 15,000 students in short and extension courses in Manitoba and Saskatchewan who are not included in this total.

x Including 2,537 in primary affiliated schools, "Primary" does not necessarily mean below high school grade.

TOTAL	-	1	632	656	178	66	697	1,712	1,517	2,435	3,942

3. In St. Dunstan's and Acadia the students in Matriculation are repeated under First Degree; they are not counted twice in the total.

The total of "First Degrees," excluded full-time 393 men and 393 women and of "Others" part-time 2 men and 7 women being duplicates between Dalhousie and King's and Toronto and Victoria and Trinity. These are also excluded in the total of students.

Notes for Table 3.

1/ Including 2,537 females in primary affiliated schools "Primary" does not necessarily mean below high school grade.

2/ Excluding 365 males and 390 female duplicates between Toronto and federated universities and 35 males and 11 females between King's and Dalhousie.

Note:- In the cases of three universities, viz. Queen's, McMaster and Saskatchewan, the students by provinces of residence represent only a portion of the total registration, viz. full-time students. For this reason the students from outside the province are probably understated in the case of these universities. The last column is intended to correct the worst features of this understatement.

PRELIMINARY REPORT OF THE UNIVERSITIES OF CANADA FOR THE
ACADEMIC YEAR ENDED June 30th, 1927.

The twenty-three universities of Canada include six state controlled (New Brunswick, Toronto, Manitoba, Saskatchewan, Alberta and British Columbia); four undenominational (Dalhousie, McGill, Queen's and Western) and thirteen denominational. Of the state universities, Toronto represents Ontario, while the others represent the provinces indicated by their names. Of the denominational, St. Dunstan's, St. Francis Xavier, St. Joseph's, Leval, Montreal and Ottawa represent the Roman Catholic Church; King's, Bishop's and Trinity the Church of England; Acadia and McMaster the Baptist Church; Mount Allison and Victoria the United Church of Canada. King's is in federation with Dalhousie while Victoria and Trinity are in federation with Toronto.

The statistics of universities are presented in this report by the following tables:

Table 1. Teaching staff

2. Registration of students including a summary of registration in colleges.
3. Full and part-time students by category, e.g. preparing for first degree, etc.
- 4&5. Full and part-time students in the various faculties. To this is appended Table 4a showing the students in the various faculties in both universities and colleges.
6. Students in vacation and extension courses.
7. Degrees, licenses, diplomas and certificates conferred in 1927.
8. Students by province or place of residence.
9. Full-time students in Arts, pure Science, Letters and Philosophy by academic years.
10. Financial Statistics.

The total teaching staff of universities in 1927 consisted of 4,263 of whom 3,335 were full-time and 928 part-time.

The total university registration, exclusive of duplicates between federated universities, was 42,546, including 26,569 men and 15,977 women; in universities and colleges it was 57,164 including 38,789 men and 18,375 women. This registration is exclusive of certain of the students in vacation and extension courses. The number of the students in these courses included in and excluded from the registration by the institutions reporting is shown in Table 2a. An estimate of those who might be mentioned in addition to the registration is impossible to make in view of duplicates between courses, but it is very close to 20,000. Most of these, however were in extension lectures to farmers and farm boys and girls throughout the province given by one state university. As statistics of similar lectures by other universities have not been reported the total number attending such lectures throughout Canada is not known. For comparison of the registration of one university with another and of one country with another, the total registration as given is adequate, but for the purpose of estimating the activities of higher institutions, especially from the point of view of expenditure, consideration of these additional students is important.

While on the question of expenditure it may be well to mention another fact which is generally overlooked. It is manifestly unsound in any case to calculate the cost of higher education on the basis of total expenditure per student registered. This calculation ignores not only items of capital and current expenditures, endowments, fees, etc., but also another very important consideration. The university functions only partly as an institution to turn out scholars whose own interests are promoted by their education; it also has other and very important functions, viz., research; the training of experts to take charge of public enterprises requiring high grade operators; the furnishing of advice from time to time on vital questions etc., etc. Then again the efficiency gained through a university education may be an asset to the country as well as to the person gaining it. However, apart from this, if institutions had to be established to function merely in an advisory and research capacity and to admit no students except a select body sufficient to keep up the supply of trained men urgently needed for public scientific enterprises their cost would far exceed the public grants paid to universities. Now, in such institutions the students admitted, apart from the consideration of the purpose of their training, would be looked upon partly as workmen. The students of actual universities, especially the graduate, and the ablest in scientific, professional and technical faculties should also

be considered in part as workmen and not merely as contributing to the cost of the institution.

For a figure representative of the population partaking of higher education rather than that representative of the activities of higher educational institutions, we suggest the number of students of university grade. In universities this number was 28,414, including 19,744 men and 8,670 women. In universities and colleges it was 31,840 including 22,566 men and 9,274 women. These figures are net and practically complete. If we add the number in Grade XII of the public and private schools, since this grade is practically equivalent to the first year in Arts, at least in so far as "pass" courses are concerned, we have about 42,840 including 27,766 men and 15,074 women.

To give content to this figure and to prevent possible misuse the following short analysis may be admissible.

ESTIMATE OF THE PROPORTION OF THE TOTAL POPULATION IN UNIVERSITY GRADE WORK:-

To obtain some conception of the significance of the number in university grade work it is necessary to have a background. The index apt to be quoted viz., that this registration is about 43 per 10,000 of the total population does not mean much, particularly because the ages represented by university students are only a small section of the range of ages of the total population and because the attendance of one year does not represent the accumulation of university men in the population. This index does not offer much clue to the proportion of the population likely to participate in higher education. A very rough conception of this proportion may be gained by comparing the number of bachelor degrees (exclusive of divinity degrees) conferred in 1927 with one-fifth of the estimated population in the five year group 20-24. This gives us 2.3 p.c.-3.1 p.c. males and 1.1 p.c. females. Say that from 3.0 to 3.5 per hundred adult males are likely to take extended university courses.

CERTAIN ASPECTS OF UNIVERSITY EDUCATION IN RELATION TO EMPLOYMENT IN GAINFUL OCCUPATIONS:

These 3 p.c. naturally have to postpone employment in gainful occupations until after the completion of their courses. The p.c. already employed in gainful occupations at 20-24 is about 92.6, while the p.c. employed at the ages 35-49 (the age group containing the maximum proportion gainfully employed) is 97.8. We interpret this to mean that at least 5.2 new positions were created after the age of 24 - "at least," for in Canada as in other countries receiving immigrants, the population has a tendency to gain rather than lose in numbers between 24 and, say the mid age of the group 35-49^x. About 6 new positions, are, therefore, opened after the age of 24. The 3 university men, have, therefore, to compete for first employment for these positions with (100-92.6-3) 4.4 who were unemployed or in other schools at the ages of 20-24 and also with immigrants arriving after 24.

Of course the features of the competition as well as the desirability of these 6 new positions depend upon their nature. Further, besides these new positions there are shiftings within the old positions for which the 3 university men compete by virtue of their training with the experience of the men already holding other positions at 20-24. If we are allowed to reason that an increase in p.c. of the population employed in a given position at 35-49 over that employed at 20-24 represents new positions while a decrease represents old positions closed we can make the following deductions:

New Positions opened between the ages 20-24 and 35-49.

1. Occupations clearly indicating promotion from other occupations including all owners except farmers but excluding professions except judges, etc	5.1
2. Other occupations indicating experience and training including professions but excluding junior office employees	12.2
3. Agriculturalists excluding farmers' sons and farm labourers ...	<u>16.7</u>
Total	34.0

^xFor every 1,000 males living at ages 20-24 in 1901 in Canada, 1,111 were living at ages 40-44 in 1921. For every 1,000 such males at 20-24 in 1901 about 866 would be expected to live at 40-44 in 1921 on the basis of a life table. It would seem therefore, that a good allowance has been made above for abnormal conditions in 1921 and for a possible change in net immigration rates etc, between 1921 and say 1941.

Old positions closed between ages 20-24 and 35-49.

1. Junior office employees except office boys	3.5
2. Preliminary occupations (junior bank clerks, apprentices farmers' sons, etc.)	16.8
3. Unskilled labour, and farm labour	7.9
4. Non-professional non-technical personal service, also "blind alley" occupations	0.6
Total	28.8

The difference between the two is the 5.2 already mentioned and which we have assumed to under-represent the new positions opened. It must not be overlooked that in the competition there are certain of the new positions which presuppose university training, so that the 3 university men have this advantage over their rivals in the second group.

Now it may be profitable to compare the gain in efficiency as indicated by increased earnings after the age of 25. For this purpose it will be necessary to use a different classification of occupations and to confine the study to the 15 principal cities instead of the whole of Canada as above. It will also be necessary to exclude owners of establishments including non-salaried doctors, lawyers, etc. This, of course, vitiates the comparison between different callings unless we assumed that professions on salary, for example, earned on the average as much as the same professions when owning establishments. A comparison will be made of the earnings in certain selected occupations of persons in the age-group 20-24 with: (1) the average earnings of the occupation in question; (2) with the earnings of the occupation at the ages 50-64, or the age group (in the case of the higher callings) receiving the maximum compensation. The following table should be self-explanatory. The earnings at 20-24 are expressed as a percentage, (1) of the average earnings, (2) of the maximum earnings. It will be remembered, of course that the 3 university men are supposed to be excluded from the earnings at 20-24. The chances of surviving until the age of maximum earnings is reached would seem to be relevant to the point and are appended to the table.

What P.C. is the Yearly Rate of Earnings in the Age Group 20-24 of the	(1)	(2)	P.C. Increase on earnings of Group 20-24 shown by	
	Average rate of Earnings of the Occu- pation	Rate of Earn- ings at Ages + 50 - 64	Average earnings of Group	Earnings of Group 50-64

1/ Duplicates between Associated Universities of King's and Dalhousie.

2/ Latin and French only. Not included in the total.

3/ In Federated Colleges as follows:- Victoria College 333 men and 340 women; Trinity College 103 men and 95 women; St. Michael's College 107 men and 107 women.

4/ In addition to a great part of 1,088 students in Summer and Extension courses.

5/ In addition to a great part of 860 students in Vacation courses and a number in extension courses.

6/ In addition to 596 not given by sex in Short courses.

7/ 2 men and 4 women or a total of 6 in this table do not reappear in the other tables except Table 8. Their categories are not known.

General Note.- The total registration is incapable of being freed from misleading features and it is suggested that the total under "C" be taken as the best index of the University population especially as it is almost satisfactorily comparable for all Universities. The extent of incomparability in this item is mainly the non-separation of intra-mural and extra-mural degree students.

In the general registration the inclusion of short courses students in the case of some Universities and their exclusion in the case of others render the total registration defective. The extent of the deficiency may be seen in the small table immediately following.

2A. - Balance table between Table 2 and following Tables

Institutions	(1)	(2)	(3)	(4)		(5)	(6)	(7)	(8)

Total	42,546	37,328	5,218	4,892	25,495	-	30,187	5/25,427	28,414

- 1/ Either duplicates between full and part-time courses or extra-mural not entered into registration.
- 2/ Differences of 6 not accounted for.
- 3/ Not accounted for; probably students of Associated Colleges.
- 4/ Students of Brandon College, S.V.
- 5/ These are not necessarily missing in the total registration; some at least are duplicated with other short courses and others with full-time and part-time courses. An estimate of the number in addition to the 42,545 registered is suggested at 20,000 making a total of 62,545 connected with universities. The University Standard Students are probably fully represented by 28,413 as above.
- 6/ Some of these were doing work of University Standard although not heading for degrees. This applies to column 5 in general.

Name of Faculty	Universities				1/ Colleges				Total (excluding duplicates)

Corr. Short Other Courses	--	-	8	25,495	-	-	4	246	-	-	12	25,741

Pre-matriculation students are excluded in full-time courses, and in part-time courses in the case of Universities. Some students below university stan-
dard in other faculties than Arts, however are included, nearly all of the part-time courses in Colleges belonging to this category. The full-time
and part-time students in the last four columns of the table, therefore, should not be added for a grand total; also for the reason that the
short or correspondence courses include degree students in Arts and other faculties.

- 1/ Including only the portion of the registration of Colleges which is not given under Universities. 2/ Excluding the Classical Colleges,
Independent Classical Schools, Secondary institutions for girls and other Secondary institutions in Quebec, the registration of all of which are
understood to be included with those of Laval and Montreal. The registration given in Arts, however, includes 67 m. in Rhetoric and Belles Lettres
in 1 Independent Superior Institution. 3/ Excluding duplicates between Toronto, Victoria and Trinity. 4/ Excluding duplicates between Toronto and
St. Michael's; Western and Waterloo College; McMaster and Brandon. Duplicates between the Quebec Catholic Universities the Classical and other
colleges have been excluded by using figures of the universities only in the totals. 5/ Excluding duplicates between Montreal and the School of
H.C. S. 6/ Excluding duplicates between University of Manitoba and Manitoba Law School. 7/ Excluding duplicates between Laval and St. Anne's Montreal and
McGill/Macdonald. 8/ Excluding duplicates between McGill and Macdonald College. 9/ So far as can be ascertained, the figures of others and their
affiliated colleges are mutually exclusive. Of these some 1,209 were in Arts and Science. 10/ In addition there were some 1,209 in short and
correspondence degree course, in Arts and Science, the number of post-graduate students in Arts and Science was 889 full time and 132 part-time.

										4,436

1/ Including 4 M and 3 W not entered in the total registration given in Table 2. These are included in Tables 4 and 5.

2/ 189 male. Students, either full-time or part-time are not accounted for in this table. They are probably enrolled in one of the affiliated or associated institutions. They are included in Table 2.

3/ Evidently there is a displacement of 11 between the sexes either in this table or Table 2. It does not affect the total.

4/ 92 men and 80 women or a total of 172 are missing in this table but included in Table 2. Evidently the students of Brandon Collogeo.

5/ Excluding 20 registered in two faculties.

6/ 5 men and 4 women entered by Faculties in Dalhousie are either duplicates between full-time and part-time students or for other reasons are not included in the total registration shown in Table 2.

A. Full-time Students.

This table does not include pre-matriculation students in Arts, Pure Science and Engineering. The total in Arts and the grand total exclude 11 duplicates between Toronto, Victoria and Trinity.

- 1/ Including 7 graduate students in arts who are not elsewhere entered in the total registration.
- 2/ Including 33 in Architecture.
- 3/ Including 138 male graduate students whose faculty was not designated.
- 4/ Including modern language.
- 5/ Optometry.
- 6/ Including pure science and letters.
- 7/ The balance is taken at Ontario Agricultural College for which see
- 8/ Included in Arts.
- 9/ Not including students in household science in the faculty of arts.
- 10/ Taken at Ontario College of pharmacy for which see
- 11/ Taken at federated theological colleges.
- 12/ Taken at Ontario veterinary colleges.
- 13/ Navigation.
- 14/ Excluding 20 registered in two faculties.
- 15/ Extra-mural not specified.
- 16/ Including 20 in architecture.
- 17/ Industrial psychology.
- x Excluding Matriculation Students and were possible other students below University Standard. These are shown in Tables 2, 3 and 5.
- 18/ Excluding duplicates between Toronto, Victoria and Trinity and Dalhousie and King's. These duplicates are mainly in Arts.

TABLE 5.- UNIVERSITIES OF CANADA: STUDENTS BY FACULTIES, 1926-27.

1/ Extra mural and not entered in the total registration in Table 2.

2/ Evidently duplicate with arts as it is not added separately to make total in Table 2.

3/ Including a certain number in modern languages.

4/ Optometry.

5/ Including pure science and letters.

6/ See Table 4. 7/ Excluding duplicates in Dalhousie, An King's and Toronto, Victoria and Trinity.

Note.- A balance sheet between Tables 4 and 5 is found as follows:

Table 4 contains only students of University Standard; Table 5 contains in addition to these all matriculation students and 32 in Commerce in St. Dunstan's and 119 in primary work in St. Joseph's who were below University Standard. The 23,154 full-time students in Table 4 = 21,487 First Degree / 926 Graduate / 1,052 "other" - 151 in courses below University Standard in Table 5. Duplication between University as per note 6 explains the difference between the foot totals and the sums of the columns. Differences between Table 5 and Table 2 are due to Vacation Courses and extra-mural students.

M.P.C.-Mathematique., Physique et Chimie.

1/ King's associated with Dalhousie. In consequence the degrees mentioned in connection with these Universities would be expected to contain a certain amount of duplications. Undergraduates enrolled at King's before May 1923 take their degrees at King's. Dalhousie grants all degrees in arts to students enrolling after that date. Presumably all the degrees mentioned above for King's are not duplicated with those mentioned for Dalhousie. Also those in Theology in future reports will be peculiarly King's

2/ Of which 12 B.A., 1 B.Sc. and 1 L.L.D. are conferred on Male students and 11 B.A. are conferred on female students of Brandon's college.

All degrees and diplomas except in Theology are entered under Toronto and not added twice in the total.

Note:- In the cases of three universities, viz. Queen's, McMaster and Saskatchewan, the students by provinces of residence represent only a portion of the total registration, viz. full-time students. For this reason the students from outside the province are probably understated in the case of these universities. The last column is intended to correct the worst features of this understatement.

1/ Full-time students only in the case of some of the Universities.
2/ Less 20 duplicates. The registration represents Arts, Applied Science and Medicine in the case of Queen's and McMaster.
3/ Not including Summer School and Extension Course Students.

Table 9:- UNIVERSITIES OF CANADA: NUMBER OF FULL-TIME STUDENTS IN ARTS, PURE SCIENCE, LETTERS AND PHILOSOPHY BY ACADEMIC YEARS, 1926-27.

Name of University	Prep.	1st. Year	2nd. Year	3rd. Year	4th. Year	Total full- time Arts, etc. (Under Grad.)	Graduate	No. of

British Columbia	-	539	250	185	153	12/1,127	42	146	1,582
Total of 13 giving students by years.	6,869	3,309	2,620	1,935	1,696	9,560	633	1,782	31,192

- 1/ Evidently one of these was also registered in Theology.
- 2/ Of these 114 are preparing for Master's degrees and 40 for Doctor's degrees; 16 of them are missing in the number of graduate students given in Tables 3&4, presumably because they are also registered in other Faculties or are extra-mural and not counted in the total registration.
- 3/ Includes Arts only and not 91 in Pure Science.
- 4/ Including 6 B.Sc. on the understanding that this degree is awarded to Arts students.
- 5/ Including 415 B.A., 38 B.Com., 103 B.A. Sc., and 5 LL.B. (Commerce and Law are included in Arts in Toronto University).
- 6/ In addition there were 112 in Philosophy not given years.
- 7/ 24 Ph.B.'s were not included in the above for the sake of consistency. See Note 6.
- 8/ Not including Brandon degrees.
- 9/ Including 15 B.Sc. assumed to be conferred on students in Pure Science.
- 10/ The complete number of full-time students in Arts and Pure Science was 629 so that 59 are missing in the above total.
- 11/ 62 B.A. and 27 B.Sc.
- 12/ Not including 50 "partial" full-time students preparing for first degree.

Note:- For foot notes see next page.

- 1/ Other than board and lodging.
- 2/ Including board and lodging.
- 3/ Including 76,942 from dining hall and dormitories.
- 4/ Including 81,961 on dining hall and dormitories which may be partly capital. A dining hall was erected in 1926.
- 5/ Approximate.
- 6/ Not including lands given by the city of Montreal and estimate at \$1,000,000. It should also be noticed that the financial items shown for Montreal do not include the great part of the affiliated institutions. Since such institutions both in the case of Montreal and Laval form a more important part of the university organization than in the case of most of the other universities, the financial figures are proportionately understated by their exclusion. In 1925-26 the expenditure of the classical colleges affiliated to Montreal was \$1,135,961 and of other schools \$348,752; of the classical colleges affiliated to Laval roughly \$705,617 and of other schools \$91,808. These figures would add to the expenditure of Montreal almost \$1,500,000. This added to the expenditure given in the table would place the figures of Montreal on a more comparable basis with those of other universities. However the affiliations of McGill and Toronto are also very heavy and not included. It is not always possible to separate in the case of the affiliations of any university, the financial obligations incurred on account of students credited to these universities from the obligations incurred on account of high school, technical and even elementary pupils and students.
- 7/ Excluding Laval. The only items known for Laval are provincial government grant \$25,000; value of immovable property \$630,000. This of course does not include the affiliated colleges, certain financial items of which may be found in the report of colleges. q.v.
- 8/ The items of assets for Toronto are for the year 1926. The total assets for 1927 were \$12,936,871. If possible these will be itemized in the final report. All the other items for Toronto are for the year 1927. The financial items of Toronto are all or practically independent of those shown for Victoria, Trinity and St. Michael's.

PRELIMINARY REPORT OF THE UNIVERSITIES OF CANADA FOR THE
ACADEMIC YEAR ENDED June 30th, 1928.

Advance Figures.

The following tables contain a part of the information reported by the 23 universities of Canada in 1927-28, in advance of a more complete summary to follow early in the New Year.

The total teaching staff over and above non-teaching heads, etc., was 4,077 including 3,542 men and 535 women; 3,199 were full-time, while 2,140 were professors - full, associate and assistant. The large number of part-time staffs and the wide range in grades of staffs render comparison between universities possible only when complete data are given; consequently no table of staffs by individual universities is included below. These will be given in the more complete report.

The total number of students reported in full-time and part-time courses was 44,923 and in vacation courses 11,683. A close approximation to the total (excluding duplicates) formed by combining these two figures is 56,619, which may be taken as the total student body of universities.

The total number of students of university standard was about 30,000, including 1,109 in vacation courses not mentioned in the registration. About 3,000 might be added to this figure on the score of colleges, making a grand total of about 33,000 students of university standard, of whom 4,194 were in vacation (including extra-mural) courses. The large proportion of degree students in vacation courses is remarkable being more than 1 student to every 7 in regular courses.

The intra-mural students of university standard in the 23 universities made a total of about 27,000. Each of 9 universities had more than 1,000 such students, one university system having over 6,000 and 3 others having from two to three thousand. The smallest enrolment of intra-mural university standard students was 72. The eleven largest universities had 87 p.c. of the students of this category.

The assets of universities (not including two universities for which financial figures have not yet been reported for the year) amounted to \$92,000,000; the income was nearly \$11,000,000, of which \$4,900,000 was contributed by governments and municipalities. The expenditure was over \$11,000,000 of which \$658,000 was capital. The total expenditure showed a decrease of some \$200,000 from the previous year, the capital expenditure being little more than one-third of what it was last year.

The number of degrees, licenses, diplomas and certificates granted during the year was 5,749 - 3,633 to men and 2,116 to women. An increase of 500 was shown in the case of women, the men showing about the same as last year. Over 3,000 were Bachelor degrees, of which about 920 were conferred on women; over 300 were Masters' and about 400 were Doctors' degrees.

1/ Mainly duplicates between the Associated Universities, King's and Dalhousie
2/ Latin and French only.
3/ Excluding duplicates between Dalhousie and King's and the matriculation students in acadia since the latter are university grade students who are taking certain matriculation subjects.
4/ Approximately.
5/ 193 males not accounted for by courses. 6/ Approximately. Obtained by subtracting 193 university standard plus 3,223 in matriculation from the total 3,800.
7/ In Federated Colleges as follows: Victoria College 366 men and 367 women; Trinity College 123 men and 118 women; St. Michaels's College 137 men and 121 women; Ontario College of Pharmacy 107 men and 5 women.
8/ Excluding duplicates between Toronto, Victoria and Trinity.
9/ To the total of 2,633 add the most of 1,434 in Summer school and extension courses. 660 of these were not given by sex. See next table.
10/ In addition to the total of 2,557 shown above there were 35 men and 6 women entered in the total registration who are not accounted for by full-time, part-time and vacation courses. The total registration reported by the university was 1,834 men, 764 women, 2,598 total.
11/ In addition there were 640 in vacation courses who were not given by sex. As it is not likely that any of these 640 have been included in the above registration, the total registration of British Columbia is 2,381.

Trinity	296	278	18	-	-	-	296	296
Western	963	869	94	138	528	766	1,625	963
Queen's	3,558	1,502	2,056	2,001	55	2,056	3,558	3,031
Ottawa	3,314	3,314	-	-	-	-	3,314	600
McMaster	562	557	5	-	-	-	562	562
Manitoba	2,633	2,389	244	329	1,434	1,763	4,152	2,587
Saskatchewan	2,557	1,217	1,340	204	1,139	1,340	2,557	1,376
Alberta	1,536	1,193	343	104	239	343	1,536	1,268
British Columbia	1,741	1,759	-	604	-	640	2,399	1,741
6/ Total	49,971	44,923	3/ 5,099	4,194	7,389	11,683	5/ 6,607	28,915

1/ Six men are mentioned in full-time and part-time courses who are not included in the total registration - probably duplicates.

2/ The excess here is evidently due to duplication. There also seems to be a misplacement of 193 males.

3/ As there were none mentioned in vacation courses the 18 and the 5 are probably extra mural students who were considered as not belonging to any category specified.

4/ Plus 18 full-time students not taking degree work.

5/ Some of these may be duplicated among vacation courses or between vacation and part-time students but nevertheless an approximate total student body is given in column 8 which makes no allowance for such duplication. This is believed to involve a smaller error than the omission of column 7 or guessing at the amount of duplication would involve. Column 9 however contains the truly representative data of university registration.

6/ Excluding 1,026 duplicates between federated universities.

Table 3.- Universities of Canada: Financial Statistics, 1927-28.

University	Source of Income			Expenditure		
	Total Assets	Governments and municipal-ities	Total Income	Current	Capital	Total

HIGHER EDUCATION IN CANADA IN THE ACADEMIC YEAR ENDING JUNE, 1929.

As the index on the preceding page demonstrates, the statistics for both Universities and Colleges in Canada are presented in this Report. The first part deals solely with Universities, after which there follow, table for table, (with two omissions) corresponding data for Professional, Technical, and Affiliated Colleges. The Report concludes with three tables summarizing the information for Universities and Colleges combined.

In the University group are included 23 institutions as in previous reports, - six under the control of their respective provincial governments (New Brunswick, Toronto, Manitoba, Saskatchewan, Alberta and British Columbia), four other undenominational (Dalhousie, McGill, Queen's and Western), and the remainder denominational. Of the last group St. Dunstan's, St. Francis Xavier, St. Joseph's, Laval, Montreal, and Ottawa represent the Roman Catholic Church; Kings, Bishop's and Trinity the Church of England; Acadia and McMaster the Baptist Church; Mount Allison and Victoria the United Church of Canada. King's is in close association with Dalhousie, while Victoria and Trinity are in federation with Toronto. At least three institutions operating on University Charters (College du Sacre Coeur, Bathurst West, N.B; College Saint Anne, Church Point, N.S.; St. Mary's College, Halifax) are included with Colleges in order to preserve the comparability of University statistics for the present year with those of previous years. In the Report on Higher Education for 1930 a rearrangement of the grouping of institutions is contemplated.

In the College section 97 institutions are reported. The great majority of these, 83 in all, give instruction either in Arts or Theology or both, many of them maintaining preparatory departments as well. 29 of the 83 are mainly or exclusively devoted to theological studies, the other 44 mainly to Arts and pre-matriculation work. The remaining 14 Colleges consist of 5 Agricultural, 2 Law, 1 Pharmacy, 1 Commercial, 1 Veterinary, 1 Art, 1 Bible, 1 Military and 1 Technical.

The teaching staff of Universities in 1929 consisted of 2,862 full-time and 1,348 part time of all ranks, - a total of 4,210 of whom 3,677 were men and 533 women. Persons engaged in teaching in the Colleges totalled 2,016 of whom 1,872 were men and 144 women.

The gross enrolment reported by Universities was 57,254, by Colleges 25,137. It is not uncommon, however, for a student to be taking part of his work in a University and part in an affiliated college, - hence to be reported by both institutions. After eliminating these duplications as is done in table 20, the net total of students enrolled during the year was found to be 72,152, of whom 46,354 were males and 25,798 were females. Almost exactly 50 p.c. or 36,038 were engaged in work of university standard, i.e. were in courses for which matriculation is pre-requisite. Of these, 23,543 were men, 12,495 women. It is noteworthy that the proportion of women doing work of university grade is almost as great as in the total enrolment, - 34.7 p.c. in the former, 35.8 p.c. in the latter. More than one-half (viz., 18,900) of the students doing work not of university grade were doing pre-matriculation or other high school work. The remaining 17,217 were divided among a wide variety of courses for admission to which matriculation standing is not demanded.

The 57,254 students in Universities were composed of 41,587 full time, 4,499 part time, and 12,095 short course, extra-mural and extension students (there being 927 duplicates between groups). Similarly, of the 25,137 students in Colleges, 20,012 were full time, 1,582 part time, and 3,543 in short, extra-mural and extension courses. In the gross total (without eliminating the duplicates between Universities and Colleges) of full time students the proportion doing work of university standard was 52.3 p.c., among part time was 40.0 p.c., among short course, etc., was 30.5 p.c. The great majority of the remainder of full time students were doing work preparatory to matriculation, whereas in the other two groups there were practically none engaged in high school work. Their numbers consist largely of persons studying specific subjects, - notably agriculture, household science, commerce, music, etc.

A comparison of the registration in 1929 by faculties with that of 1928 shows that the increasing university attendance in Canada is not confined to any one or a few branches of learning. A comparatively uniform gain is noticeable in the full time students of practically all faculties.

	<u>Full Time</u>		<u>Part Time</u>	
	1928	1929	1928	1929
Matriculation	16,091	18,024	9	5
Arts and Pure Science	15,843	17,359	646	841
Letters	19	18	272	292
Philosophy	390	344	286	310
Agriculture	1,049	1,246	86	20
Commerce	719	848	482	432
Dentistry	475	434	2	18
Education	1,884	2,045	395	435
Engineering and Applied Science	2,502	2,781	5	6
Household Science	1,134	1,210	72	51
Law	862	881	2	3
Medicine	2,698	2,744	22	19
Music #	505	99	669	1,911
Public Health and Nursing #	400	659	628	188
Pharmacy	506	550	2	-
Social Service	70	66	178	50
Theology	1,530	1,600	72	176
Veterinary Science	92	156	-	-
Other x	3,969	3,086	405	305
Forestry	153	171	1	-
Short and extra mural courses for degrees			3,936	4,779
" " " " " not " "			10,294	10,859

x "Other" includes commerce students not of university grade, elementary school grades, about 400 students of Art, 200 Bible students, etc.

The irregularity in the figures for Music and Public Health result from an alteration of the method of classifying full time and part time students.

In the total of 6,772 degrees, licences and diplomas granted by Universities and Colleges, 2,427 or 35.7 p.c. were conferred on women, 4,345 on men. The most popular degree with both men and women is B.A., 1,274 being received by men, 912 by women. Next in order with men are M.D. 639, and B.Sc. 322.

Total assets reported amounted to \$129,080,664. This includes endowments, lands, buildings, equipment and all other property of the institutions reporting, except in a few cases where the value of property was not appraised. Total income for the academic year was \$15,074,337 of which \$2,435,344 was derived from investments or endowments, \$6,383,338 from provincial or municipal grants, \$2,969,265 from tuition and other fees (excepting board and lodging) paid by the students, and the balance from other or unclassified sources.

The tables giving the place of residence of students illustrate the increasing popularity of Canadian institutions of higher learning among students of other countries. In a total of 54,845 students in 1928 classified by country of residence, 1,556 were residents of the United States, 294 of the United Kingdom, 65 of the British West Indies including Bermuda and British Guiana, and 393 of other countries. The largest representation from any country in the latter group is probably from Newfoundland whence come considerable numbers particularly to the Universities of the Maritimes and Central Canada. In a total of 57,723 whose place of residence was specified for 1929 the corresponding figures were United States 1,741, United Kingdom 422, British West Indies 60, Other Countries 476.

Among students permanently resident in Canada there is a considerable inter-provincial movement as the following table for 1929 demonstrates.

	Students of other provinces enrolled within province	Students of province enrolled in other provinces
Prince Edward Island	49	222
Nova Scotia	497	420
New Brunswick	424	587
Quebec	1,162	925
Ontario	2,092	806
Manitoba	509	308
Saskatchewan	148	1,056
Alberta	247	407
British Columbia	47	432
Yukon and N.W.T.	-	11

Examination of the tables from which this summary is taken would seem to suggest that there are three main reasons for this migration. (1) A university or college in a neighboring province may be nearer than the institutions in the province of residence. Provincial boundaries constitute no barrier, for a student's academic standing in one province is readily recognized in another. (2) The University in one province may not have the faculty in which a student desires to study, e.g. a faculty of medicine or dentistry. (3) French students attend universities where French is the main language. Ottawa University, the nearest French University, has 126 students from Saskatchewan.

1/ Other than board and lodging.									11,441,447	11,323,670	644,474
2/ Including board and lodging.											11,968,144

3/ It should be noticed that the financial items shown for Montreal and Laval do not include the great part of the affiliated institutions. Since such institutions in each case form a more important part of the university organization than in the case of most of the other universities, the financial figures are proportionately understated by their non-inclusion.

4/ Component items not distinguishable.

5/ Includes property to the value of \$4,354,083 (Man. Agric. College, \$4,072,521, etc.) vested in the Provincial Government but used by the University.

*Estimated separation on basis of information given in the report of the Provincial Statistician. The enrolment of the Classical Colleges is given at 10,308 of whom 7,884 were in the classical course, 1,612 in the Commercial course and 812 in the Primary course. In the section on superior education, the Statistician shows 2,740 in Arts from the Classical Colleges; these are assumed to be full-time degree students.

Higher Education in Canada in Academic Year Ending June 1929.

Statistics for both Universities and Colleges are presented in the Preliminary Report on Higher Education in Canada for the Academic Year ending June 1929. The first part deals solely with Universities after which there follow corresponding data for Professional, Technical, and Affiliated Colleges. The Report concludes with three tables summarizing the information for Universities and Colleges combined.

In the University group are included 23 institutions as in previous reports, - six under the control of their respective provincial governments (New Brunswick, Toronto, Manitoba, Saskatchewan, Alberta, and British Columbia), four other undenominational (Dalhousie, McGill, Queen's and Western), and the remainder denominational. Of the last group St. Dunstan's, St. Francis Xavier, St. Joseph's, Laval, Montreal and Ottawa represent the Roman Catholic Church; King's, Bishop's and Trinity the Church of England; Acadia and McMaster the Baptist Church; Mount Allison and Victoria, the United Church of Canada. King's is in close association with Dalhousie, while Victoria and Trinity are in federation with Toronto.

In the College section 97 institutions are reported. The great majority of these, 83 in all, give instruction either in Arts or Theology or both, many of them maintaining preparatory departments as well. Twenty-nine of the eighty-three are mainly or exclusively devoted to theological studies, the other forty-four mainly to Arts and pre-matriculation work. The remaining 14 Colleges consist of 5 Agricultural, 2 Law, 1 Pharmacy, 1 Commercial, 1 Veterinary, 1 Art, 1 Bible, 1 Military, and 1 Technical.

The teaching staff of Universities in 1929 consisted of 2,862 full time and 1,348 part time of all ranks, a total of 4,210 of whom 3,677 were men and 533 women. Persons engaged in teaching in the Colleges totalled 2,016, of whom 1,872 were men and 144 women.

The gross enrolment reported by Universities was 57,254, by Colleges 25,137. It is not uncommon, however, for a student to be taking part of his work in a University and part in an affiliated College, - hence to be reported by both institutions. After eliminating these duplications the net total of students enrolled during the year is found to be 72,152 of whom 46,354 were males and 25,798 females. Almost exactly 50 p.c. or 36,038 were engaged in work of University standard, i.e. were in courses for which matriculation is pre-requisite. Of these 23,543 were men, 12,495 women. It is noteworthy that the proportion of women doing work of university grade is almost as great as in the total enrolment, - 34.7 p.c. in the former, 35.8 p.c. in the latter. More than half, (viz., 18,900) of the students doing work not of university grade were doing pre-matriculation or other high school work. The remaining 17,217 were divided among a wide variety of courses for admission to which matriculation standing is not demanded. Prominent among the subjects studied by this group were agriculture, household science, commerce and music.

A comparison of the registration in 1929 by faculties with that of 1928 shows that the increasing university attendance in Canada is not confined to any one or a few branches of learning. A comparatively uniform gain is noticeable in the full time students of practically all faculties, while short courses and correspondence courses - particularly those leading to degrees - have retained their growing popularity.

In the total of 6,772 degrees, licences, and diplomas granted by universities and colleges 2,427 or 35.7 p.c. were conferred on women, 4,345 on men. The most popular degree with both men and women is B.A., 1,274 being received by men, 912 by women. Next in order with men are M.D. 639, and B.Sc. 322.

Total assets reported amounted to \$129,080,664. This includes endowments, lands, buildings, equipment and all other property of the institutions reporting, except in a few cases where the value of property was not appraised. Total income for the academic year was \$15,074,337. Of the expenditure 95.2 p.c. was classed as current, 4.8 p.c. as capital.

The tables giving the place of residence of students illustrate the increasing popularity of Canadian institutions of higher learning among students of other countries. In a total of 54,845 students in 1928 classified by country of residence, 1,556 were residents of the United States, 294 of the United Kingdom, 65 of the British West Indies, including Bermuda and British Guiana, and 393 of other countries. The largest

representation from any country in the latter group is probably from Newfoundland whence come considerable numbers particularly to the universities of the Maritimes and Central Canada. In a total of 57,723 whose place of residence was specified for 1929 the corresponding figures were United States 1,741, United Kingdom 422, British West Indies 60, other countries 476.

Among students permanently resident in Canada there is a considerable inter-provincial movement for which there seem to be three main causes. (1) A university or college in a neighboring province may be nearer than the institutions in the province of residence. Provincial boundaries constitute no barrier, for a student's academic standing in one province is readily recognized in another. (2) The university in one province may not have the faculty in which a student desires to study, e.g., a faculty of medicine or dentistry. (3) French students attend universities where French is the main language. Ottawa University, the nearest French University, has 126 students from Saskatchewan. When allowance is made for these three factors there is little reason in any case for thinking that students prefer the course in a university of another province to that of the university in their own.

81-D-21

Preliminary Report on Higher Education
in Canada in the Year 1929-30.

Advance Figures.

The three tables presented herewith record the enrolment, teaching staff, and finances, respectively of institutions of higher education in Canada in the academic year ending June 30, 1930. In the case of a few institutions for which a report has not yet been received for 1929-30, the figures of the previous year have been used. This, however, does not seriously affect the validity of Dominion totals as the students not reported represent less than ten per cent of the total enrolment, and less than five per cent of the enrolment of university grade.

The number of students in 1929-30 compares with the preceding year as follows:

	1929-30			1928-29		
	Men	Women	Total	Men	Women	Total
University Grade	26,100	12,144	38,244	23,543	12,495	36,038
Pre-matriculation	11,225	6,927	18,152	12,527	6,373	18,900
Other	11,265	6,709	17,974	10,287	6,930	17,217
Total, excluding duplicates	48,399	25,784	74,183	46,354	25,796	72,152

It will be noticed that the increase of 2,000 in enrolment occurred entirely among the men, women remaining at a standstill. The male increase, moreover, was most pronounced in post-matriculation students or students of university standard,--being over 2,500, as opposed to a decrease of 1,300 pre-matriculation males, and an increase of 1,000 doing other work. Information concerning the enrolment at a number of the larger institutions in the current year suggests that this rate of increase has not been maintained, and that the total of the past year may not have been reached. But the decrease, if any, has not been great, and may be considered a respite from the pronounced strain on university accommodation of recent years, rather than a serious handicap.

Table II. shows the distribution of teaching staffs among the three groups, preparatory grades, university grades in academic subjects, and professional courses. The totals for the Dominion summarize thus:

	Full-time	Part-time
Pre-matriculation, or Preparatory	1,246	83
Arts, Pure Science, Letters and Philosophy	1,682	258
Other, i.e. Professional	1,868	1,015
Total, excluding duplicates	4,786	1,331

The high proportion of part-time instructors in professional courses is due, in the main, to the number of men in the practice of medicine, law and other professions who use a part of their time to take charge of a university course or to deliver a series of lectures.

The income of the institutions included in the report was \$18,441,000 in 1929-30. The comparable figure for the preceding year was \$17,343,000. Of the larger sum, \$6,952,000 was derived from government and municipal grants; of the smaller, \$6,593,000. The percentage increase in income over the previous year was about 6.4; in grants, about 5.5. On the side of expenditure \$1,128,000 was classed as capital expenditure. This, however, does not represent the total of expenditure of this nature actually made during the year, being exclusive of the figures for the new buildings of the University of New Brunswick, and the new McMaster plant at Hamilton for which the figures are not yet available.

HIGHER EDUCATION IN CANADA
1930 - 1931

The accompanying tables provide data for both universities and Colleges, and include all institutions offering courses the equivalent of at least two years in advance of matriculation. The affiliated colleges of each university are shown immediately after it, except where the college is situated in another province. There were 41,168 students of university standard reported,--28,960 men and 12,208 women--but the numerous preparatory and extension departments enrolled a further 36,450, making a total of 77,618, as compared with 73,515 in the preceding year.

Students of University Grade:-

Of the 41,168 university grade students 39,127 were undergraduates, and all but 7,919 were doing a full year's work in attendance. There was an unusual increase over the preceding year due in the main, no doubt, to employment conditions. Similar increases were experienced by the high schools. The larger branches of study were affected as follows:

	<u>1930</u>	<u>1931</u>
Arts, Pure Science	16,637	18,187
Engineering and Applied Science	3,380	3,827
Medicine and Dentistry	3,230	3,353
Theology	2,083	2,192
Agriculture	956	1,277
Household Science	807	995
Total, full time undergraduates	30,359	32,783

The remaining 2,041 students of university grade were pursuing post-graduate courses,--1,250 of them devoting their full time to these advanced studies. The largest graduate schools are at McGill University and the University of Toronto, but the western provincial universities enroll important numbers. Due to the different organization of faculties in the University of Montreal and Laval University it is difficult to compare the number of "graduate" students in these with the number in the others. In the sense that the term "graduate" is used in this report, it means the number proceeding to a higher degree in a faculty or department in which they already hold a bachelor's degree. All students in Montreal and Laval proceeding to the professional courses of Law, Medicine, Theology, etc., must first have completed the baccalaureate in Arts.

Students not of University Grade:-

Many of the colleges conduct preparatory or high school courses at which there were 17,982 in full-time attendance. Still others offered courses in agriculture, household science, music, etc., for which unmatriculated students were allowed to register. These had 22,154 students attending the full year, and in conjunction with summer schools, evening classes and other part-time students had a further 16,314.

Finances:-

Property value of the universities and colleges was \$168,190,000 of which \$45,000,000 was in endowments or other interest bearing investment, and the balance in lands, buildings and equipment.

Current expenses of the year amounted to \$20,079,000, while a further \$6,134,000 was spent for new buildings, etc. on capital account. The largest sum in the latter category was that of the University of Montreal for the erection of its new central building. Capital expenditures in excess of half a million dollars were also made by each of Manitoba, Queen's, Toronto and Victoria Universities. The heavy expenditures of McMaster in establishing itself at Hamilton belong to the preceding year.

The revenue from investments was \$2,581,000, from government grants \$5,896,000, from tuition fees \$3,655,935, from other sources \$7,062,000 including gifts and fees for board and lodging where they were given. Government grants fell from \$7,413,000 in the preceding year, and have been further reduced in 1932. Revenue from investments was down slightly, that from fees up considerably, as follows:

<u>Source</u>	<u>1930</u>	<u>1931</u>
Investments	\$ 2,667,250	\$ 2,581,423
Government Grants	7,413,270	5,895,794
Tuition Fees	3,261,754	3,655,935
Other Sources	6,947,962	7,061,873
Total Receipts	20,300,236	19,195,025

From the standpoint of financial support there are at least three distinct classes of institution. First there are those that rely on grants from provincial treasuries for their upkeep. Six of the provinces have such universities and the remaining three have colleges in this class. Secondly, there are the institutions such as Dalhousie, McGill and McMaster Universities, to cite a few, that rely for their support on endowments, and do not receive provincial grants. Thirdly, there are colleges either operated or controlled by religious denominations, which do not receive provincial assistance, and which may not have a financial endowment sufficient to carry them. These may have another type of endowment,--in men, so to speak, like the University of Ottawa and other Catholic Colleges conducted by religious orders. Since salaries are commonly only nominal in these schools, expenses are comparatively low per pupil accommodated. The other section of the third group--mainly Protestant theological and Arts Colleges--commonly rely on church contributions where their financial endowments are inadequate.

1/ Acadia's income includes \$83,716 as gifts.

2/ Exclusive of figures for Mt. St. Vincent College.

3/ Reverts to Consolidated Revenue Account.

4/ Included with lands, etc.

5/ Does not include expenditure made on new buildings. For the University of Montreal this had amounted to \$2,202,152 at June 1931.

a/ Other than board and lodging. In a few cases this entry is not distinguishable from other sources, e.g. the classical colleges.

b/ Including board and lodging. For some of the colleges, e.g. Pine Hill, Huron, etc., there appears under this heading receipts for board and lodging of students who are not included in their enrolment but who are attending another institution, as in the case of Pine Hill, Delhousie; in the of Huron College, the Univ. of Western Ont., etc.

HIGHER EDUCATION IN CANADA, 1932.

"The present economic situation is having pronounced and complex effects on the activities of the colleges and universities of the United States and Canada. That there will be some marked and permanent effects on educational thought and practice is already apparent.

"At the moment practically all state-supported institutions and many private foundations are suffering from diminished income. State appropriations are smaller under pressure of tax reductions; investments do not give their former return, and tuition charges are failing to produce the usual income. At the same time the educational burden in a large number of cases is increased, for persons above high-school age are just the group which unemployment throws back into schools in the largest number, particularly into state-supported institutions where tuition fees may be comparatively low, and into urban universities, both public and private, which serve large numbers of students who may economize by living at home. In some cases, particularly where tuition and living charges are comparatively high, the enrolment is diminished, but seldom to a degree that permits cuts in service charges commensurate with reduced incomes."

Dr. Henry Suzzallo, President of the Carnegie Foundation for the Advancement of Teaching, in the Annual Report of the Foundation for 1932.

The accompanying tables, indexed on the next page, give salient statistics for the individual universities, colleges and professional schools in Canada 1932. They show an enrolment of 43,143 students of university grade, an increase of 2,500 over 1931 as compared with an increase of 3,000 in that year. These are easily the largest increases of the decade, relatively as well as absolutely. The total increase over the ten year period has been about 55 p.c., the enrolment in 1922 having been 27,796.

The following summary shows the increases since the beginning of the century in the light of the population at the popular ages of university attendance,

	Population Ages 17-26.	University Student Enrolment
1932	-	43,143
1931	1,858,165	40,569
1926	-	31,368
1921	1,461,121	26,385
1916	-	16,655
1911	1,394,778	16,675
1906	-	12,389
1901	1,010,000	9,620
	(approximately)	

The increase from 9,620 in 1901 represents about 320 p.c. in thirty years. Some of the factors producing this increase may be indicated as follows:-

1. The population of university age has increased about 80 p.c.
2. The proportion of women to men in regular university courses has greatly increased. Had it remained the same as thirty years ago, the increase of 320 p.c. would not have been more than something like 250 p.c., though available records of university women in 1901 are not sufficiently complete to give an exact figure.
3. There have been pronounced increases in the facilities at the disposal of teachers and others for obtaining a higher education by means of summer schools, evening classes and other part time instruction, including correspondence. Between seven and eight thousand such students are included in the enrolment shown for 1931 or 1932. If these were omitted the increase over 1901 would be only about 245 p.c. instead of 320 p.c.

4. The lengthening of professional courses such as medicine and dentistry; and elevation to the rank of university grade (with matriculation prerequisite to admission) of courses in agriculture, veterinary science, household science, etc., have contributed materially to the increased enrolment of recent years.

When the weight of these four factors is subtracted from the total increase, it appears that the proportion of the present generation of young men receiving a university education through regular attendance is somewhat less than double the proportion in the preceding generation!

It has been shown previously by the Dominion Bureau of Statistics, by following school careers of Canadian children in recent years, that the proportion of boys getting as far as university graduation is about 4.5 p.c.; girls 1.5 p.c., or 3 p.c. of the population as a whole.

It may be of interest to have an indication of the relative situation of Canada as compared with other countries in this respect. For this purpose we give the following statistics as published by the International Confederation of Students at Warsaw. The figures represent the proportion of the total population attending universities and colleges in different countries. In interpreting them, it should be remembered:

- (1) That the age distribution of the population in different countries varies greatly due to immigration and emigration, fluctuations of the birth rate in the years about the War, etc.;
- (2) That university students do not represent students of uniform age or advancement in all countries, the first and second year Arts students of universities in Canada and the United States probably being equivalent to the final years of the secondary schools in Great Britain, France, Germany, etc., rather than to students in universities in those countries. These two years in Canada include some 40 p.c. of all university students.

U.S.A.77 p.c.	Belgium18 p.c.
Lettonia46	Norway18
Canada40	Hungary18
Austria38	Chile16
Esthonia29	Poland16
Turkey28	Holland15
Czechoslovakia25	Bulgaria.....	.14
Roumania21	Sweden13
Switzerland21	Portugal11
Finland21	Great Britain11
Germany20	Japan08
Denmark20	Russia04
France19		

If the junior students in Canada (first and second years) are excluded, the resulting figure of .24 p.c. remains to be compared with .11 p.c. in Great Britain.

The accompanying tables may be consulted for a record of the number of students following each line of study, their place of residence, the degrees that they received, and the financial records of institutions. In the case of the financial figures it should be noted that the income of several institutions has been seriously depleted in the current year, and for the year ahead.

1/ Acadia's income excludes board and lodging.
2/ Exclusive of figures for Mt. St. Vincent College.
3/ Included with lands, etc.
4/ The source of capital expenditure is not shown under "Receipts".

a/ Other than board and lodging. In a few cases this entry is not distinguishable from other sources, e.g. the classical colleges.

b/ Including board and lodging. For some of the colleges, e.g. Pine Hill, Huron, etc., there appears under this heading receipts for board and lodging of students who are not included in their enrolment but who are attending another institution.

Assistant Chief, Education Statistics:	J. E. Robbins, M.A.

HIGHER EDUCATION IN CANADA, 1933.

Enrolment.— The rapid increase in university and college enrolment in the period since the War has not continued in the last year or two. The chief reason probably hinges on finance. The universities generally, finding their other sources of revenue impaired, have found it necessary to increase the fees charged to students, and even without the higher fees the average student of 1933 would no doubt find it harder to meet the cost of a year's attendance than the student of a few years ago. The full-time enrolment in 1932 and 1933 compares as follows:

	1932	1933
Arts and Science (undergraduates)	17,168	17,179
Professions, (undergraduates)	15,564	15,038
Post graduates	1,724	1,779
Total of University grade	34,456	33,996
Pre-matriculation students, and others not of university grade	24,530	22,978

Students who were not in attendance full-time numbered 28,811, of whom 6,848 were pursuing studies of university grade.

The accompanying tables classify the enrolment of each institution individually.

Students from other countries.— Pamphlet No. 48 of the United States Office of Education (1934), entitled "Residence and Migration of College Students", shows 1,896 Canadian residents at colleges in the United States. A similar classification for Canada, made by the Dominion Bureau of Statistics, shows 1,771 United States residents at Canadian colleges, confirming the impression gained by a partial compilation about ten years ago, that there is about an equal interchange of students. The University of Montreal has 651 United States residents in attendance at its several faculties and affiliated colleges, and McGill University has 334.

The same compilation shows 180 students in Canadian colleges from Newfoundland, 43 from the British West Indies, 226 from the United Kingdom, and 278 from other countries. Over half of the Newfoundland students are in Nova Scotia.

Finances.— Current expenditures are reported at \$17,722,000 in 1933, where they were \$18,743,000 in 1932, and \$20,079,000 in 1931. Capital expenditure, which had averaged nearly \$4,000,000 per year in the preceding three years, was reported at \$830,000 in 1933.

Dominion Statistician:	R.H. Coats, LL.D., F.R.S.C., F.S.S.(Hon.)
Chief, Education Branch:	M.C. MacLean, M.A., F.S.S.
Assistant Chief, Education Statistics:	J.E. Robbins, M.A., Ph.D.

HIGHER EDUCATION IN CANADA, 1934.

The tables herewith presented deal with enrolment only. Further data, - on residence of students, degrees, staff, and finances - will appear in the "Annual Survey of Education in Canada 1934", to be published later in 1935.

Since 1931, university attendance has not continued the rapid increase of earlier post-war years, but on the other hand it has not declined, as the following summary of full-time enrolment shows:

	<u>1932</u>	<u>1933</u>	<u>1934</u>
Arts and Science (undergraduates)	17,168	17,179	17,515
Professions, (undergraduates)	15,564	15,038	15,002
Post graduates	1,724	1,779	1,758
	<hr/>	<hr/>	<hr/>
Total of University grade	34,456	33,996	34,275
Pre-matriculation students, and others not of university grade	24,530	22,978	24,435

Students not in attendance full time numbered 31,250 in 1934, of whom 7,447 were taking studies of university grade. These were mainly students of summer school and evening classes.

The accompanying Table I shows the total enrolment, classified by grade of work, for each institution individually. Table II deals with the full-time students only and shows the enrolment by faculties for each institution.

TABLE I. - UNIVERSITIES AND COLLEGES: ENROLMENT BY GRADE OF WORK, 1933-34.
